

BORMA WACHS®

Technical Informations

TURAPORI GEL

Description

TURAPORI GEL is a fast drying single component product.

Transparent and of high adhesion.

The product is ideal as a first coat of varnish or as a base for wax treatments.

The product is in a gel form and ready to use.

It's easy to apply on vertical surfaces, avoiding dripping and given that it's fast drying, it gives great results even if diluted over the advisable amount.

Chemical & physical characteristics

Appearance :	gel
Colour :	colourless
Odour .	characteristic
Dilution :	20% nitro dilution
Drying time .	2 / 3 hrs
Dry residue .	30%
Coverage :	3 sq m x 250ml 9 sq m x 750ml

Method of usage

After diluting the product, spread with the aid of a brush and wait until completely dry.

For best results, after the first coat, it is advisable to add second coat when the surface is completely dry and lightly sandpapered.

Storage

The product must be kept, stored and used according to safety and hygiene regulations of good industrial practice.

Attention

Our technical sheets are compiled on the bases of results of our tests. Nevertheless our technical advise is in good faith, but without a guarantee. Indeed different supports, conditions, applications, installations, dilutions are integrating parts of the final result and often beyond every control. The user must test the supplied products to verify if it is adaptable for his/her needs.

We can guarantee the continuity of the physical and chemical characteristics.
